

Fluorescent T5 Battens

Sleek T5

Noiseless Operation
Reduction in Power Cost
Flicker-Free Illumination

T5 battens – a new generation of linear battens offering high performance T5 fluorescent lamp operating at High Frequency.

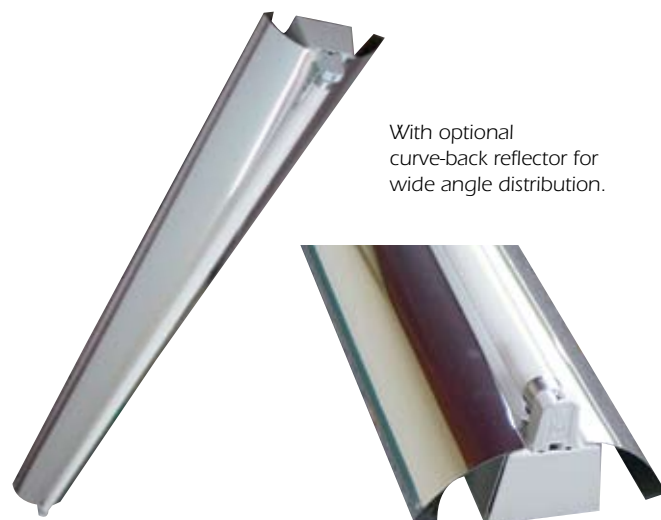

Key Features

- Battens are manufactured from die formed cold rolled steel.
- Epoxy powder coated and oven baked. Not pre coated. Gives high reflectance and durable finishing with no sharp edges to rust.
- Multiple cable entry option for direct wiring to ceiling and suitable for conduit mounting.
- Grommet cable entry to protect cable.
- High wiring standard with all internal wires retained (wires do not hang down during installation and colour coded).
